

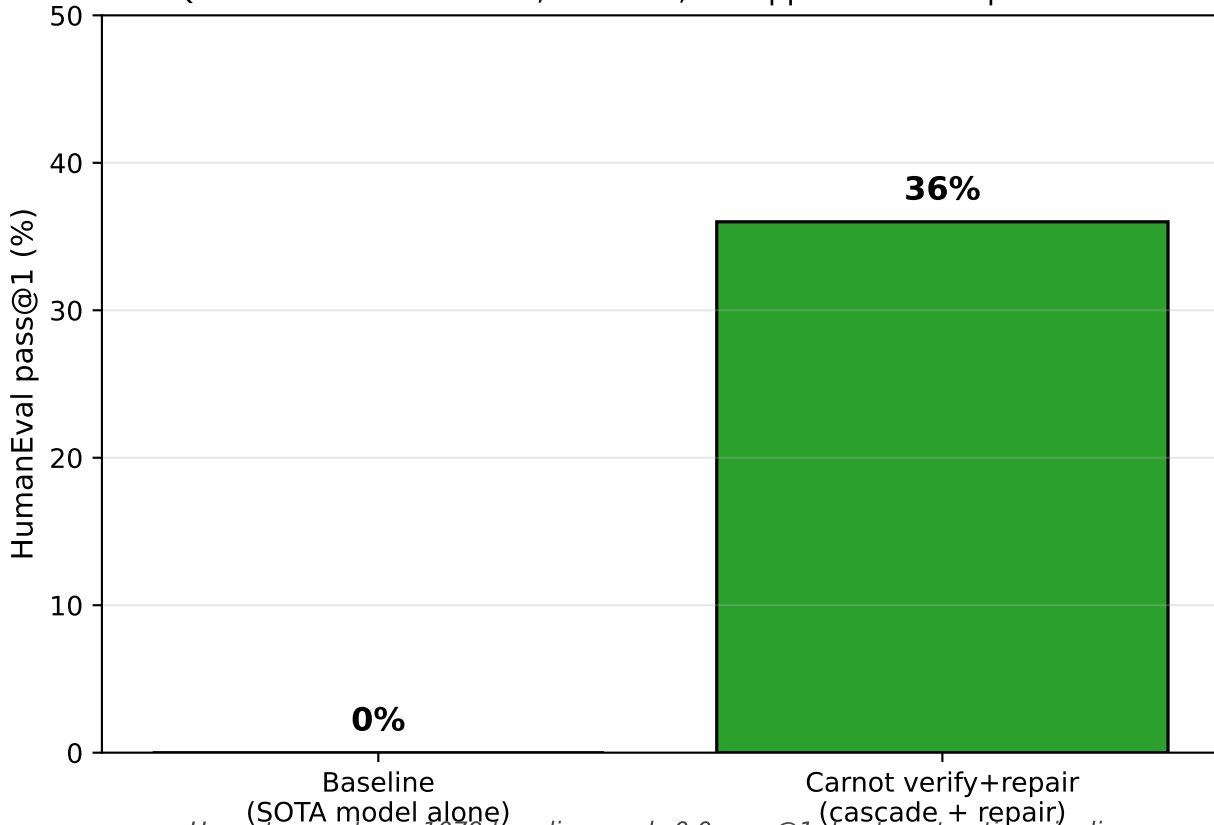

Figure 5 - HumanEval pass@1 with Carnot verify-repair (exp1079)
Qwen3.6-35B-A3B-GGUF, live GPU, +36 pp absolute improvement

Honest caveat: exp1079 baseline reads 0.0 pass@1 due to extraction-pipeline bottleneck (same harness limit produced GSM8K TP = 0). Carnot-corrected number is live GPU on Qwen3.6-35B-A3B-GGUF; extraction fix scoped for .85.
